

BRIAN NJUGUNA MACHARIA

Full-Stack Developer · AI Engineer · Android Developer · Public Administration Professional

+254 723 700 284 | briannjuguna694@gmail.com | github.com/001kenji | briannjuguna.netlify.app | Murang'a, Kenya

PROFILE SUMMARY

A versatile, self-driven professional combining a Bachelor of Public Administration & Governance (Murang'a University of Technology) with 4+ years of hands-on software development experience. Proficient in full-stack web development, AI/ML engineering, and Android application development, with an equally strong foundation in public policy analysis, research methodology, community development, and governance. Adept at bridging the gap between technology and public service to deliver data-informed, citizen-centred solutions.

EDUCATION

Bachelor of Public Administration & Governance

Murang'a University of Technology (2022 – Present, Expected 2027)

- Relevant Coursework: Public Policy Analysis, Human Resource Management, Public Finance, Development Administration, Research Methods, Ethics & Governance
- Self-taught Software Developer alongside degree studies (2022 – Present)
- Languages & Stacks: C++, JavaScript, React, Python, Django, PostgreSQL, Kotlin, Machine Learning

TECHNICAL SKILLS

Frontend	React, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Vite
Backend	Python, Django, PostgreSQL, REST APIs, JWT Authentication
Mobile	Kotlin, Jetpack Compose, Android SDK, App Architecture
AI / ML	Machine Learning, Scikit-learn, PyTorch, OpenCV, FastAPI, AI Services
Tools	Git, GitHub, Command Line, Netlify, Render, Docker (basics)
MS Office	Word, Advanced Excel (VLOOKUP, Pivot Tables), PowerPoint, SPSS

PUBLIC ADMINISTRATION SKILLS

- Policy Analysis & Review — identifying gaps and recommending evidence-based improvements
- Report Writing & Documentation — drafting formal reports, memos, and policy briefs
- Records Management & Data Administration
- Quantitative & Qualitative Research (SPSS, survey design, literature review)
- Community Engagement & Stakeholder Coordination
- Team Leadership & Collaboration in multi-disciplinary settings

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Self-Employed) | Freelance / Personal Projects 2022 – Present

- Built and deployed 31+ web and mobile applications across e-commerce, AI tools, education, and collaboration domains
- Developed Kenji Assistant — an AI-powered Android voice assistant (Kotlin, Jetpack Compose, TensorFlow), publicly released v1.0 in June 2026
- Engineered AI-powered tools: Document Translator AI (OCR/PyTorch), KCSE Topic Predictor (ML/Pandas), AI Video Creator
- Deployed production apps on Netlify (frontend) and Render (backend), maintaining CI/CD pipelines
- Stack: React · Django · PostgreSQL · Kotlin · Python · Machine Learning

Ethics & Public Service Researcher | *Narok County Research Project* 2024 – 2025

- Co-led a team-based investigation: "How Ethical Conduct Affects the Effectiveness of Public Services" commissioned for Narok County
- Co-developed research proposal, methodology, sampling framework, and data collection instruments
- Conducted literature review and contributed to SPSS-based data analysis and interpretation
- Authored sections of the final report with actionable recommendations for improving county governance and service delivery

Community Development Volunteer | *Mukuyu, Murang'a County* 2024

- Participated in a multi-stakeholder environmental clean-up initiative in partnership with Kiharu Technical Institute and the County Government of Murang'a
- Coordinated waste collection, sorting, and responsible disposal to protect public health and promote environmental sustainability
- Collaborated with county officials, students, and community members to raise environmental awareness

KEY PROJECTS

- Kenji Assistant — AI Android voice assistant (Kotlin · Jetpack Compose · TensorFlow). GitHub: github.com/001kenji/Assistant-AI-Code
- E-Soie — Full-stack e-commerce platform with JWT auth & payment system (React · Django · PostgreSQL). Live: soie.netlify.app
- EduLearn Pro — Online learning platform with progress tracking (React · Django · Redis)
- KCSE Topic Predictor — ML model analysing 20+ years of exam papers to forecast likely topics (Python · Scikit-learn)
- Collaborative Whiteboard — Real-time multi-user drawing tool (React · Fabric.js · WebSockets). Live: whiteboard-meet.netlify.app
- Document Translator AI — OCR-powered document translation across multiple languages (Python · OpenCV · PyTorch)

ACHIEVEMENTS & ACTIVITIES

- Participated in the MUT Hackathon 2024 — developed innovative tech-based solutions in a competitive team environment
- Released Kenji AI Assistant v1.0 (2026) after six months of independent R&D — available for public download
- Delivered 31+ deployed applications across web, mobile, and AI domains since 2022
- Successfully led environmental conservation multi-stakeholder initiative, Mukuyu, Murang'a
- Active in data management, customer service research, and online research interests
