Public Administration Professional · Governance & Policy · Community Development
+254 723 700 284 · briannjuguna694@gmail.com · [briannjuguna.netlify.app](#) · Murang'a, Kenya

CAREER OBJECTIVE

A proactive and analytically driven third-year Bachelor of Public Administration & Governance student at Murang'a University of Technology, pursuing a career in public service, governance, and community development. Combines strong academic grounding in public policy and administration with practical research experience, inter-agency collaboration, and a technology edge — uniquely positioned to support data-informed, citizen-centred public service delivery.

EDUCATION

Bachelor of Public Administration & Governance

Murang'a University of Technology (2022 – Present, Expected 2027)

- ▶ Relevant Coursework: Public Policy Analysis, Human Resource Management, Public Finance, Development Administration, Ethics & Governance, Research Methods
- ▶ GPA: On track for honours — consistent academic performance across policy and administration modules

CORE COMPETENCIES

Policy Analysis	Reviewing legislation, identifying implementation gaps, drafting evidence-based policy recommendations
Research	Survey design, literature review, quantitative (SPSS) and qualitative data collection and analysis
Report Writing	Drafting formal reports, policy briefs, memos, and stakeholder communications
HR & Administration	Records management, data administration, HR process support, office coordination
Stakeholder Mgmt	Coordinating with government agencies, community leaders, academic institutions, and NGOs
Technology	MS Office (Word, Advanced Excel, PowerPoint), SPSS, data management systems, online research
Leadership	Team coordination, project facilitation, community mobilisation, mentorship

EXPERIENCE & PROJECTS

Ethics & Public Service Researcher · Narok County Research Project 2024 – 2025

- ▶ "How Ethical Conduct Affects the Effectiveness of Public Services" — a commissioned team-based policy investigation for Narok County government
- ▶ Co-developed the research proposal, objectives, methodology, and data collection instruments (survey tools, interview guides)
- ▶ Conducted extensive literature review on public service ethics, governance, and accountability frameworks in Kenya
- ▶ Contributed to data analysis using SPSS; drafted findings and policy recommendations for county stakeholders
- ▶ Delivered practical, actionable recommendations to improve governance accountability and service delivery efficiency

Community Development Volunteer · Mukuyu Location, Murang'a County 2024

- ▶ Participated in a multi-stakeholder environmental clean-up initiative in partnership with Kiharu Technical Institute and the County Government of Murang'a
- ▶ Coordinated waste collection, sorting, and responsible disposal activities involving students, community members, and county officials
- ▶ Promoted environmental awareness and public health education within the Mukuyu community
- ▶ Demonstrated effective inter-agency collaboration and grassroots community engagement

MUT Hackathon Participant · Murang'a University of Technology 2024

- ▶ Collaborated in a cross-disciplinary team to design and prototype technology-driven public sector solutions
- ▶ Applied public administration principles to technology solution framing — bridging governance theory and practical innovation

PUBLIC ADMINISTRATION SKILLS

- ▶ Public Policy Analysis & Review — identifying regulatory gaps and recommending evidence-based improvements
- ▶ Development Administration — understanding of devolution, county government structures, and public finance management
- ▶ Human Resource Management — HR principles, performance management, staff welfare considerations
- ▶ Records & Data Management — systematic document classification, retrieval, and data quality assurance
- ▶ Community Engagement — grassroots mobilisation, participatory development, stakeholder consultation
- ▶ Communication — formal report writing, public speaking, inter-departmental liaison

TECHNOLOGY ADVANTAGE IN PUBLIC SERVICE

Unique among public administration candidates: brings software development expertise that directly supports e-governance, digital record systems, data-driven policy analysis, and public service technology modernisation.

- ▶ Proficient in Advanced Excel (VLOOKUP, Pivot Tables, dashboards) and SPSS for data analysis
- ▶ Capable of building digital tools to support administrative processes, reporting systems, and citizen services
- ▶ Experience with AI and data systems relevant to public sector digital transformation agendas

ACHIEVEMENTS & INTERESTS

- ▶ Completed applied governance research for Narok County — practical policy output with real-world application
- ▶ Led participation in multi-stakeholder environmental initiative — demonstrated community partnership and coordination skills
- ▶ Active interest in: public sector data management, customer service delivery, governance research, and digital administration
- ▶ MUT Hackathon 2024 — innovation in public sector problem-solving
